

# Measuring Perimeter

## Lesson 5

### In Focus

How do we find the perimeter of this figure?

### Let's Learn

- Recall that perimeter is the length around the figure.

Use a ruler to measure the length of each side.

$$\begin{aligned} \text{Perimeter} &= 5 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} + 5 \text{ cm} \\ &= 16 \text{ cm} \end{aligned}$$

- Find the perimeter of this figure.

Use a ruler to measure.

$$\begin{aligned} \text{Perimeter} &= \boxed{\phantom{00}} \text{ cm} + \boxed{\phantom{00}} \text{ cm} + \boxed{\phantom{00}} \text{ cm} + \boxed{\phantom{00}} \text{ cm} \\ &= \boxed{\phantom{00}} \text{ cm} \end{aligned}$$

### Guided Practice

- Measure the perimeter of each figure.

(a)

$$\text{Perimeter} = \boxed{\phantom{00}} \text{ cm}$$

(b)

$$\text{Perimeter} = \boxed{\phantom{00}} \text{ cm}$$

Name the figures.

- Calculate the perimeter of each figure.

(a)

$$\text{Perimeter} = \boxed{\phantom{00}} \text{ cm}$$

(b)

$$\text{Perimeter} = \boxed{\phantom{00}} \text{ cm}$$
