

# Finding Angles in Shapes

## Lesson 3

### In Focus

A stop sign is a shape.  
How many angles does this shape have?

### Let's Learn

- Find all the angles inside the shape. How many angles can you find?

Here is one angle.

Here is another angle.

- Find the number of sides and angles in Figure A.

Figure A

Figure A has  sides.

Figure A has  angles.

How many angles does a triangle have?

- Describe this shape.

How many sides are there?

How many angles are there?

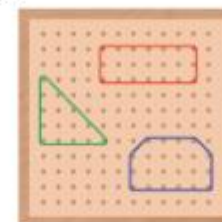

### Activity Time

Work in pairs.

What you need:

- Form shapes with different numbers of sides.

- Mark and count the number of angles in each shape.

What do you observe about the number of sides and the number of angles for each shape?

### Guided Practice

How many sides and angles does each shape have?  
Mark the angles in each shape.
