

Ivy Bank Primary School

End of year Maths expectations for

EYFS

This booklet provides information for parents and carers on the end of year maths expectations for children in our school. These expectations are the minimum requirements your child needs to meet if they want to be secure and make continued progress the following year.

Any extra support you can provide in helping your child achieve these targets is greatly valued. On the website there are some ideas on how best to support your child and these will be updated each half term.

If you have any questions regarding the content of this booklet or would like support in knowing how best to help your child, please speak to your child's class teacher.

Mathematics is a specific area of learning and development within the Early Years Foundation Stage and includes Number and Shape, Space and Measure. Children develop essential skills and knowledge as they progress towards the Early Learning Goals. Children use a wide range of practical resources inside and outside and are encouraged to develop their problem solving skills in a variety of ways.

By the end of Reception a child working at the age related expectation should be able to:

Number

- To count reliably with numbers from one to 20.
- To place numbers in order and say which number is one more or one less than a given number.
- To use quantities and objects to add and subtract two single-digit numbers and to count on or back to find the answer.
- To solve a range of problems, including doubling, halving and sharing.

Shape, Space and Measure

- To use everyday language to talk about size, weight, capacity, position, distance, time and money.
- To compare quantities and objects and to solve problems.
- To recognise, create and describe patterns.
- To explore the characteristics of everyday objects and shapes and use mathematical language to describe them.
