

Draw one straight line from top to bottom to make 1.

Round and down then across the base to make 2.

Go round in a curve and around again and you've got 3.

Draw down and across, then cut the line to make 4.

Draw down and around then across at the top to make 5.

Start with a curve and go round in a loop to make 6.

Draw one flat line and one line down to the ground to make 7.

Start with an S then loop back around to make 8.

Start with a loop then a line straight down to make 9.

Draw a one and an oval to make 10.

Let's all draw the number 1, once learnt never forgotten.

It's one straight line from top to bottom and now you've seen just how it's done you'll always know how to draw the number one.

Let's all draw the number two, let's keep up the pace.

Round and down then across the base, that's truly all you need to do. Now you know how to draw the number two.

Let's all draw the number three, we're going to tell you when.

Go round in a curve and around again, and if you're stuck then copy me as we show you all how to draw the number three.

Let's all draw the number four, try to copy mine.

Draw down and across, then cut the line, it's never going to be a chore. Now you know how to draw the number four.

Five! Don't let the party stop! Draw down and around then across at the top.

Six! We are cock-a-hoop! Start with a curve and go round in a loop.

With seven, no need to wear a frown. It's one flat line and one line down. Seven!

Let's all draw the number eight, let's get this off the ground.

Start with an S then loop back around, it's always going to turn out great. Now you know how to draw the number eight.

Let's all draw the number nine, we're really going to town.

Start with a loop then a line straight down, this is how those two combine. The easy way to draw

Let's all draw the number ten, draw a one and an oval then do it once you can do it again.

Now you know you have learnt how to draw all the numbers up to ten!
