

Measuring Perimeter

Lesson 4

In Focus

What is wrong with their methods?

Let's Learn

- 1 Find the perimeter.

Perimeter = $12 \times 2 \text{ cm}$
= 24 cm

$$\begin{array}{r} 12 \\ \times 2 \\ \hline 24 \end{array}$$

Sam forgot that  is 2 cm.

- 2 Find the perimeter.

The dotted lines are not part of the perimeter.

The perimeter is
 $12 \times 2 \text{ cm} = 24 \text{ cm}$.

- 3 Find the perimeter.

$5 \times 2 \text{ cm} = 10 \text{ cm}$
 $5 \times 2 \text{ cm} = 10 \text{ cm}$

$2 \times 10 \text{ cm} = 20 \text{ cm}$
This is not yet the perimeter.

I need to add
4 cm to 20 cm to get
the perimeter.

The perimeter is $20 \text{ cm} + 4 \text{ cm} = 24 \text{ cm}$.

Guided Practice

- 1 Find the perimeter of each figure.

- (a) The perimeter of figure A is cm.
- (b) The perimeter of figure B is cm.
- (c) The perimeter of figure C is cm.
- (d) The perimeter of figure D is cm.
