

## Worksheet 10

### Calculating Perimeter

- 1 Find the perimeter of the remaining piece of paper when a square or rectangle is cut out, as shown below.

$$\begin{aligned} \text{Perimeter} &= 10 + 8 + 8 + 2 + 2 + 6 = 36 \\ &= 36 \text{ cm} \end{aligned}$$

$$\begin{aligned} \text{Perimeter} &= 4 + 16 + 2 + 12 + 2 + 4 = 40 \\ &= 40 \text{ cm} \end{aligned}$$

- 2 Find the perimeter of the remaining piece of paper when two squares or rectangles are cut out, as shown below.

$$\begin{aligned} \text{Perimeter} &= 12 + 10 + 12 + 10 + 4 + 4 = 52 \\ &= 52 \text{ cm} \end{aligned}$$

$$\begin{aligned} \text{Perimeter} &= 10 + 5 + 10 + 5 = 30 \\ &= 30 \text{ cm} \end{aligned}$$
